## **SECTION 2: Hazards identification**

2.1 Classification of the substance or mixture

 Product definition
 Mixture

 Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Not classified.

See sections 11 and 12 for more detailed information on health effects and symptoms and environmental hazards.

| 2.2 Label elements  |   |
|---|---|
| Signal word   | No signal word.   |
| Hazard statements   | No known significant effects or critical hazards.   |
| Precautionary statements  |   |
| Prevention  | Not applicable.   |
| Response  | Not applicable.   |
| Storage   | Not applicable.   |
| Disposal  | Not applicable.   |
| Supplemental label<br>elements  | Contains Naphthenic acids, zinc salts, basic. May produce an allergic reaction. Safety data sheet available on request. |
| EU Regulation (EC) No. 1907/2   | 2006 (REACH)  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market<br>and use of certain<br>dangerous substances,<br>mixtures and articles | Not applicable.   |
| Special packaging requirement   | <u>its</u>  |

| ſ | Product name   | Spheerol AP 3 |                         |        | Product code 451345 | -BE26    | Page: 1/11 |

|   | Version 1      | Date of issue | 30 July 2021            | Format | Germany             | Language | ENGLISH    |
|   | Date of previo | us issue      | No previous validation. |        | (Germany)           |          |            |

### Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830

## **SECTION 2: Hazards identification**

| Containers to be fitted<br>with child-resistant<br>fastenings  | Not applicable.  |
|--|--|
| Tactile warning of danger  | Not applicable.  |
| 2.3 Other hazards  |  |
| Results of PBT and vPvB assessment   | Product does not meet the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII.   |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII | This mixture does not contain any substances that are assessed to be a PBT or a vPvB.  |
| Other hazards which do not result in classification  | Defatting to the skin.<br>Note: High Pressure Applications<br>Injections through the skin resulting from contact with the product at high pressure constitute a<br>major medical emergency.<br>See 'Notes to physician' under First-Aid Measures, Section 4 of this Safety Data Sheet. |

## **SECTION 3: Composition/information on ingredients**

#### **3.2 Mixtures**

**Product definition** 

Mixture

Highly refined base oil (IP 346 DMSO extract < 3%). Proprietary performance additives. Thickening agent.

| Product/ingredient<br>name          | Identifiers   | %  | Regulation (EC) No.<br>1272/2008 [CLP]                              | Туре    |
|-------------------------------------|---|----|---|---------|
| Naphthenic acids, zinc salts, basic | REACH #: 01-2119988500-34<br>EC: 282-762-6<br>CAS: 84418-50-8 | <1 | Eye Irrit. 2, H319<br>Skin Sens. 1, H317<br>Aquatic Chronic 3, H412 | [1] [2] |

#### See Section 16 for the full text of the H statements declared above.

**Type** 

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

[6] Additional disclosure due to company policy

Occupational exposure limits, if available, are listed in Section 8.

## **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| Eye contact                | In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Get medical attention.      |
|----------------------------|--|
| Skin contact               | Wash skin thoroughly with soap and water or use recognised skin cleanser. Remove<br>contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before<br>reuse. Get medical attention if irritation develops. |
| Inhalation                 | If inhaled, remove to fresh air. Get medical attention if symptoms occur.  |
| Ingestion                  | Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.   |
| Protection of first-aiders | No action shall be taken involving any personal risk or without suitable training.   |

#### 4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

| Potential acute health | <u>n effects</u>   |
|------------------------|--|
| Inhalation             | No known significant effects or critical hazards.  |
| Ingestion              | No known significant effects or critical hazards.  |
| Skin contact           | Defatting to the skin. May cause skin dryness and irritation.                                |
| Eye contact            | No known significant effects or critical hazards.  |
| Delayed and immediat   | te effects as well as chronic effects from short and long-term exposure                      |
| Inhalation             | Inhalation of oil mist or vapours at elevated temperatures may cause respiratory irritation. |

| Inhalation of oil mist or var | pours at elevated temperatures | may cause respiratory irritation. |
|-------------------------------|--------------------------------|-----------------------------------|
|-------------------------------|--------------------------------|-----------------------------------|

| ſ | Product name   | Spheerol AP 3 |                         |        | Product code 451345 | -BE26    | Page: 2/11 |
|---|----------------|---------------|-------------------------|--------|---------------------|----------|------------|
|   | Version 1      | Date of issue | 30 July 2021            | Format | Germany             | Language | ENGLISH    |
|   | Date of previo | us issue      | No previous validation. |        | (Germany)           |          |            |

#### Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830

#### **SECTION 4: First aid measures** Ingestion Ingestion of large quantities may cause nausea and diarrhoea. Potential risk of transient stinging or redness if accidental eye contact occurs. Eye contact 4.3 Indication of any immediate medical attention and special treatment needed Treatment should in general be symptomatic and directed to relieving any effects. Notes to physician Note: High Pressure Applications Injections through the skin resulting from contact with the product at high pressure constitute a major medical emergency. Injuries may not appear serious at first but within a few hours tissue becomes swollen, discoloured and extremely painful with extensive subcutaneous necrosis. Surgical exploration should be undertaken without delay. Thorough and extensive debridement of the wound and underlying tissue is necessary to minimise tissue loss and prevent or limit permanent damage. Note that high pressure may force the product considerable distances along tissue planes.

## **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media                           |   |  |  |  |
|---|---|--|--|--|
| Suitable extinguishing media                      | In case of fire, use water fog, alcohol resistant foam, dry chemical or carbon dioxide extinguisher or spray.   |  |  |  |
| Unsuitable extinguishing media                    | Do not use water jet. The use of a water jet may cause the fire to spread by splashing the burning product.   |  |  |  |
| 5.2 Special hazards arising fro                   | om the substance or mixture   |  |  |  |
| Hazards from the substance or mixture             | No specific fire or explosion hazard.   |  |  |  |
| Hazardous combustion<br>products                  | Combustion products may include the following:<br>carbon oxides (CO, CO <sub>2</sub> ) (carbon monoxide, carbon dioxide)<br>metal oxide/oxides  |  |  |  |
| 5.3 Advice for firefighters                       |   |  |  |  |
| Special precautions for<br>fire-fighters          | No action shall be taken involving any personal risk or without suitable training. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire.   |  |  |  |
| Special protective<br>equipment for fire-fighters | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |  |  |  |

## SECTION 6: Accidental release measures

| 6.1 Personal precautions, protective equipment and emergency procedures |  |  |  |  |
|---|--|--|--|--|
| For non-emergency<br>personnel  |  |  |  |  |
| For emergency responders  | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |  |  |  |
| 6.2 Environmental precautions   | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.<br>Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).   |  |  |  |
| 6.3 Methods and material for co   | ntainment and cleaning up  |  |  |  |
| Small spill   | Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.   |  |  |  |
| Large spill   | Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Avoid creating dusty conditions and prevent wind dispersal. If emergency personnel are unavailable, contain spilt material. Suction or scoop the spill into appropriate disposal or recycling vessels, then cover spill area with oil absorbent. Dispose of via a licensed waste disposal contractor. |  |  |  |

| Product name Spheerol AP 3 |               |                         | Product code 451 | Page: 3/11 |          |         |
|----------------------------|---------------|-------------------------|------------------|------------|----------|---------|
| Version 1                  | Date of issue | 30 July 2021            | Format           | Germany    | Language | ENGLISH |
| Date of previo             | us issue      | No previous validation. |                  | (Germany)  |          |         |

# **SECTION 6: Accidental release measures**

| 6.4 Reference to other | See Section 1 for emergency contact information.  |
|------------------------|---|
| sections               | See Section 5 for firefighting measures.<br>See Section 8 for information on appropriate personal protective equipment. |
|                        | See Section 12 for environmental precautions.<br>See Section 13 for additional waste treatment information.             |

# **SECTION 7: Handling and storage**

| 7.1 Precautions for safe hand  | dling  |
|--|--|
| Protective measures  | Put on appropriate personal protective equipment.  |
| Advice on general occupational hygiene                                 | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Wash thoroughly after handling. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | Store in accordance with local regulations. Store in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Store and use only in equipment/containers designed for use with this product. Do not store in unlabelled containers. |
| Not suitable   | Prolonged exposure to elevated temperature   |
| Germany - Storage code   | 11   |
|  |  |

```
7.3 Specific end use(s)
```

Recommendations

See section 1.2 and Exposure scenarios in annex, if applicable.

# SECTION 8: Exposure controls/personal protection

|                                    | ensure that all items of personal protective equipment are compatible.   |
|------------------------------------|--|
| Individual protection measures     |  |
| Hygiene measures                   | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Ensure that eyewash stations and safety showers are close to the workstation location.  |
| Respiratory protection             | In case of insufficient ventilation, wear suitable respiratory equipment.<br>For protection against metal working fluids, respiratory protection that is classified as "resistant<br>to oil" (class R) or oil proof (class P) should be selected where appropriate. Depending on the<br>level of airborne contaminants, an air-purifying, half-mask respirator (with HEPA filter) including<br>disposable (P- or R-series) (for oil mists less than 50mg/m3), or any powered, air-purifying<br>respirator equipped with hood or helmet and HEPA filter (for oil mists less than 125 mg/m3).<br>Where organic vapours are a potential hazard during metalworking operations, a combination<br>particulate and organic vapour filter may be necessary.<br>The correct choice of respiratory protection depends upon the chemicals being handled, the<br>conditions of work and use, and the condition of the respiratory equipment. Safety procedures<br>should be developed for each intended application. Respiratory protection equipment should<br>therefore be chosen in consultation with the supplier/manufacturer and with a full assessment<br>of the working conditions. |
| Eye/face protection                | Safety glasses with side shields.  |
| Skin protection<br>Hand protection | General Information:   |
|                                    | Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. The correct choice of protective gloves depends upon the chemicals being handled, and the conditions of work and use. Most gloves provide protection for only a limited time before they must be discarded and replaced (even the best chemically resistant gloves will break down after repeated chemical exposures).   |
|                                    | Gloves should be chosen in consultation with the supplier / manufacturer and taking account of a full assessment of the working conditions.  |
|                                    | Recommended: Nitrile gloves.<br>Breakthrough time:   |
|                                    | Breakthrough time data are generated by glove manufacturers under laboratory test conditions<br>and represent how long a glove can be expected to provide effective permeation resistance. It<br>is important when following breakthrough time recommendations that actual workplace<br>conditions are taken into account. Always consult with your glove supplier for up-to-date<br>technical information on breakthrough times for the recommended glove type.<br>Our recommendations on the selection of gloves are as follows:   |
|                                    | Continuous contact:  |
|                                    | Gloves with a minimum breakthrough time of 240 minutes, or >480 minutes if suitable gloves can be obtained.<br>If suitable gloves are not available to offer that level of protection, gloves with shorter breakthrough times may be acceptable as long as appropriate glove maintenance and replacement regimes are determined and adhered to.  |
|                                    | Short-term / splash protection:  |
|                                    | Recommended breakthrough times as above.<br>It is recognised that for short-term, transient exposures, gloves with shorter breakthrough times<br>may commonly be used. Therefore, appropriate maintenance and replacement regimes must<br>be determined and rigorously followed.   |
|                                    | Glove Thickness:   |
|                                    | For general applications, we recommend gloves with a thickness typically greater than 0.35 mm.   |
|                                    | It should be emphasised that glove thickness is not necessarily a good predictor of glove resistance to a specific chemical, as the permeation efficiency of the glove will be dependent on the exact composition of the glove material. Therefore, glove selection should also be based on consideration of the task requirements and knowledge of breakthrough times. Glove thickness may also vary depending on the glove manufacturer, the glove type and the glove model. Therefore, the manufacturers' technical data should always be taken into account to ensure selection of the most appropriate glove for the task.  |
|                                    | Note: Depending on the activity being conducted, gloves of varying thickness may be required for specific tasks. For example:  |
| Product name Spheerol AP 3         | Product code 451345-BE26 Page: 5/11  |

| Version 1      | Date of issue | 30 July 2021            | Format | Germany   | Language | ENGLISH |  |
|----------------|---------------|-------------------------|--------|-----------|----------|---------|--|
| Date of previo | ous issue     | No previous validation. |        | (Germany) |          |         |  |

# SECTION 8: Exposure controls/personal protection

|                                 | <ul> <li>Thinner gloves (down to 0.1 mm or less) may be required where a high degree of manual dexterity is needed. However, these gloves are only likely to give short duration protection and would normally be just for single use applications, then disposed of.</li> <li>Thicker gloves (up to 3 mm or more) may be required where there is a mechanical (as well as a chemical) risk i.e. where there is abrasion or puncture potential.</li> </ul>  |
|---------------------------------|---|
| Skin and body                   | Use of protective clothing is good industrial practice.<br>Personal protective equipment for the body should be selected based on the task being<br>performed and the risks involved and should be approved by a specialist before handling this<br>product.<br>Cotton or polyester/cotton overalls will only provide protection against light superficial<br>contamination that will not soak through to the skin. Overalls should be laundered on a regular<br>basis. When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a<br>risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots<br>will be required. |
| <u>Refer to standards:</u>      | Respiratory protection: EN 529<br>Gloves: EN 420, EN 374<br>Eye protection: EN 166<br>Filtering half-mask: EN 149<br>Filtering half-mask with valve: EN 405<br>Half-mask: EN 140 plus filter<br>Full-face mask: EN 136 plus filter<br>Particulate filters: EN 143<br>Gas/combined filters: EN 14387   |
| Environmental exposure controls | Emissions from ventilation or work process equipment should be checked to ensure they<br>comply with the requirements of environmental protection legislation. In some cases, fume<br>scrubbers, filters or engineering modifications to the process equipment will be necessary to<br>reduce emissions to acceptable levels.   |

# **SECTION 9: Physical and chemical properties**

## 9.1 Information on basic physical and chemical properties

| Appearance                                      |  |
|---|--|
| Physical state                                  | Grease   |
| Colour  | Amber. to Brown.   |
| Odour   | Not available.   |
| Odour threshold                                 | Not available.   |
| рН  | Not applicable.  |
| Melting point/freezing point                    | Not available.   |
| Initial boiling point and boiling range         | Not available.   |
| Drop Point                                      | >180 °C  |
| Flash point                                     | Closed cup: >150°C (>302°F) [Estimated. Based on Lubricants - Base Oils] |
| Evaporation rate                                | Not available.   |
| Flammability (solid, gas)                       | Not available.   |
| Upper/lower flammability or<br>explosive limits | Not available.   |
| Vapour pressure                                 | Not available.   |
| Vapour density                                  | Not available.   |
| Relative density                                | Not available.   |
| Density   | <1000 kg/m³ (<1 g/cm³) at 25°C   |
| Solubility(ies)                                 | insoluble in water.  |
| Partition coefficient: n-octanol/<br>water      | Not available.   |
| Auto-ignition temperature                       | Not available.   |
| Decomposition temperature                       | Not available.   |
| Viscosity                                       | Kinematic: >20.5 mm <sup>2</sup> /s (>20.5 cSt) at 40°C                  |
| Explosive properties                            | Not available.   |
| Oxidising properties                            | Not available.   |
|   |  |

| Product name Spheerol AP 3 |               |                         | Product code 451345-E | Page: 6/11 |          |         |

| Date of previo             | ous issue     | No previous validation. |                       | (Germany)  |          |         |

# **SECTION 9: Physical and chemical properties**

9.2 Other information

No additional information.

| SECTION 10: Stability and reactivity       |   |  |  |  |  |
|--|---|--|--|--|--|
| 10.1 Reactivity                            | No specific test data available for this product. Refer to Conditions to avoid and Incompatible materials for additional information.                                   |  |  |  |  |
| 10.2 Chemical stability                    | The product is stable.  |  |  |  |  |
| 10.3 Possibility of<br>hazardous reactions | Under normal conditions of storage and use, hazardous reactions will not occur.<br>Under normal conditions of storage and use, hazardous polymerisation will not occur. |  |  |  |  |
| 10.4 Conditions to avoid                   | Avoid all possible sources of ignition (spark or flame).  |  |  |  |  |
| 10.5 Incompatible materials                | Reactive or incompatible with the following materials: oxidising materials.   |  |  |  |  |
| 10.6 Hazardous                             | Under normal conditions of storage and use, hazardous decomposition products should not be produced   |  |  |  |  |

## **SECTION 11: Toxicological information**

| 11.1 Information on toxicologic  | cal effects  |  |  |  |  |
|--|--|--|--|--|--|
| Acute toxicity estimates   |  |  |  |  |  |
| Not available.   |  |  |  |  |  |
| Information on likely routes of exposure   | Routes of entry anticipated: Dermal, Inhalation.   |  |  |  |  |
| Potential acute health effects   |  |  |  |  |  |
| Inhalation   | No known significant effects or critical hazards.  |  |  |  |  |
| Ingestion  | No known significant effects or critical hazards.  |  |  |  |  |
| Skin contact   | Defatting to the skin. May cause skin dryness and irritation.                                |  |  |  |  |
| Eye contact  | No known significant effects or critical hazards.  |  |  |  |  |
| Symptoms related to the physical sectors in the sector sec | sical, chemical and toxicological characteristics  |  |  |  |  |
| Inhalation   | No specific data.  |  |  |  |  |
| Ingestion  | No specific data.  |  |  |  |  |
| Skin contact   | Adverse symptoms may include the following:<br>irritation<br>dryness<br>cracking             |  |  |  |  |
| Eye contact  | No specific data.  |  |  |  |  |
| Delayed and immediate effect   | s as well as chronic effects from short and long-term exposure                               |  |  |  |  |
| Inhalation   | Inhalation of oil mist or vapours at elevated temperatures may cause respiratory irritation. |  |  |  |  |
| Ingestion  | Ingestion of large quantities may cause nausea and diarrhoea.                                |  |  |  |  |
| Eye contact  | Potential risk of transient stinging or redness if accidental eye contact occurs.            |  |  |  |  |
| Potential chronic health effec   | <u>ts</u>  |  |  |  |  |
| General  | No known significant effects or critical hazards.  |  |  |  |  |
| Carcinogenicity  | No known significant effects or critical hazards.  |  |  |  |  |
| Mutagenicity   | No known significant effects or critical hazards.  |  |  |  |  |
| Developmental effects  | No known significant effects or critical hazards.  |  |  |  |  |
| Fertility effects  | No known significant effects or critical hazards.  |  |  |  |  |
|  |  |  |  |  |  |

# **SECTION 12: Ecological information**

12.1 Toxicity

**Environmental hazards** 

Not classified as dangerous

### 12.2 Persistence and degradability

Not expected to be rapidly degradable.

#### 12.3 Bioaccumulative potential

This product is not expected to bioaccumulate through food chains in the environment.

| ſ | Product name   | Spheerol AP 3 |                         |        | Product code | 451345-BE26 | Page: 7/11 |
|---|----------------|---------------|-------------------------|--------|--------------|-------------|------------|
|   | Version 1      | Date of issue | 30 July 2021            | Format | Germany      | Language    | ENGLISH    |
|   | Date of previo | ous issue     | No previous validation. |        | (Germany)    |             |            |

## **SECTION 12: Ecological information**

### 12.4 Mobility in soil Soil/water partition coefficient (Koc) Mobility

Not available.

Spillages are unlikely to penetrate the soil.

#### 12.5 Results of PBT and vPvB assessment

Product does not meet the criteria for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII.

### 12.6 Other adverse effects

Other ecological information This product is unlikely to disperse in water.

Yes

## SECTION 13: Disposal considerations

#### 13.1 Waste treatment methods

#### **Product**

Methods of disposal

Where possible, arrange for product to be recycled. Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations.

### Hazardous waste

European waste catalogue (EWC)

| Waste code | Waste designation    |  |  |
|------------|----------------------|--|--|
| 12 01 12*  | spent waxes and fats |  |  |

However, deviation from the intended use and/or the presence of any potential contaminants may require an alternative waste disposal code to be assigned by the end user.

#### **Packaging**

Methods of disposal

Where possible, arrange for product to be recycled. Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations.

| Waste code   |   |  |  |
|--|---|--|--|
| waste code   | European waste catalogue (EWC)  |  |  |
| 15 01 10* packaging containing residues of or contaminated by hazardous substances |   |  |  |
| Special precautions  | This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. |  |  |

## **SECTION 16: Other information**

All reasonably practicable steps have been taken to ensure this data sheet and the health, safety and environmental information contained in it is accurate as of the date specified below. No warranty or representation, express or implied is made as to the accuracy or completeness of the data and information in this data sheet.

The data and advice given apply when the product is sold for the stated application or applications. You should not use the product other than for the stated application or applications without seeking advice from BP Group.

It is the user's obligation to evaluate and use this product safely and to comply with all applicable laws and regulations. The BP Group shall not be responsible for any damage or injury resulting from use, other than the stated product use of the material, from any failure to adhere to recommendations, or from any hazards inherent in the nature of the material. Purchasers of the product for supply to a third party for use at work, have a duty to take all necessary steps to ensure that any person handling or using the product is provided with the information in this sheet. Employers have a duty to tell employees and others who may be affected of any hazards described in this sheet and of any precautions that should be taken. You can contact the BP Group to ensure that this document is the most current available. Alteration of this document is strictly prohibited.
