

Tribol™ GR PS HT Range

High-temperature Greases

Description

Castrol Tribol™ GR PS HT (previously named Optitemp PS) are solid-free high-temperature greases for highly loaded rolling and sliding bearings at low and medium speeds.

These products feature a water resistance which is exceptional for high-temperature greases as well as an excellent corrosion protection. Tribol GR PS HT Range are easily conveyable in centralized lubricating systems and is therefore especially suited for total loss lubrication.

Application

- Sterilizers in the food and beverage industries.
- Eccentric presses, forging presses.
- Continuous casting plants.
- Calender bearings.
- Bearings in Conti presses in the wood industry.
- Roll stand bearings.
- Temperature application range: - 25°C/- 13°F to + 160°C/+ 320°F (up to +200°C/+ 392°F in case of total loss lubrication)

Advantages

- High wear protection - even at slow speeds. High load carrying capacity.
- Resistant to hot and cold water. High corrosion protection.
- Excellently suited for centralized lubricating systems (Tribol GR PS 1 HT)
