

# **ULTRAPLEX XT 2 SYNT**

## SYNTHETIC LITHIUM COMPLEX GREASE

### **DESCRIPTION**

Formulated with synthetic bases, complex lithium soap and additives for improving oxidation, rust prevention, antiwear properties and load carrying capacity. It contains PTFE.

### **APPLICATIONS**

Specially indicated for the lubrication of:

- Bearings subject to high thermal and mechanical requirements, and the presence of water, like drying roller bearings in paper or textile industries, conveyor bearings in steel industry, etc.
- Bearings of ventilators, furnaces and dryers in textile industry, wood industry, plastic and food and beverage industries.

### **PROPERTIES**

- from -35°C up to 180°C, and a peak temperature of 200 °C for short periods with frequent relubrication
- high mechanical stability, even in extrem conditions of great effort, under aggressive factors such as moisture and water vapors.
- Good load carrying capacity.
- medium high speeds (speed factor ndm up to 500.000).
- High resistance to aging.
- High corrosion protection of metallic parts.
- High water resistance.

### **QUALITY LEVEL:**

- ISO - L - XCGEB 2
