

METABOND HI-TECH 1,5 EP Grease

Product Datasheet

Product name: Metabond HI-TECH 1,5 EP GREASE

The **Metabond HI-TECH 1,5 EP** is a versatile, over-alkaline, high-temperature, metal tempering, anti-wear, calcium based top quality grease. Metabond HI-TECH 1,5 EP adopts the latest grease technology available today and with its 1,5 penetration and pressure resistant ingredients, its qualities extend far beyond traditional greases.

| Characteristic Properties | Unit of Measurement | Typical Value |
|----------------------------------|----------------------------|--------------------------------|
| Soap/thickener | | calcium |
| Colour | | blue |
| Odour | | petroleum |
| Physical state | | liquid, paste |
| Density (15°C) | g/cm ³ | 1,20503 - 1,26103 |
| Flash point | °C | 160 |
| Solubility in water (20°C) | | practically insoluble in water |
| Vapor pressure | Hgmm | <5 |
| Cone penetration (250°C): | tenths of mm | 283-315 |

The stated values in this document are based on the measurements of an accredited laboratory and are mean values.

Depending on the characteristics of the supply of raw materials, small differences may occur during the manufacturing process. This does not affect the quality of the finished product.
