

# BARDAHL THR 300

High temperature and high resistant grease

## Description

Calcium sulfonate complex grease

## Property

Resists to heavy load, high pressure and shocks  
Resists to water washing out  
Do not mix with another grease.

## Application

Port and marine equipment (resists to sea water)  
Plain bearings or highly loaded reducers  
Agriculture and duty works  
Mineral extraction or mill equipment's.

## References

	Bearings, Wheel bearings
Application	
Use	Quick rotation
Temperature range	+220°C, -25°C
Properties	Anti-wear, Compatible with bronze, Extreme pressure, Resistance to water
Category	High temperatures, Industrial greases
Active substance	Sulfonate of CA
Type of grease	Anti-seize paste
