#### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### **1.1 Product identifier**

| Trade name   | : Shell Gadus S2 V220 0 |
|--------------|-------------------------|
| Product code | : 001D8448              |

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

| Use of the Sub-<br>stance/Mixture | : Automotive and industrial grease.   |
|-----------------------------------|---|
| Uses advised against              | :<br>This product must not be used in applications other than those<br>listed in Section 1 without first seeking the advice of the sup-<br>plier. |

#### 1.3 Details of the supplier of the safety data sheet

| Manufacturer/Supplier  | : Shell Deutschland GmbH<br>Suhrenkamp 71-77<br>D-22335 Hamburg  |
|--|--|
| Telephone<br>Telefax<br>Email Contact for Safety Data<br>Sheet | <ul> <li>: (+49) 40 6324-6255</li> <li>: (+49) 40 6321-051</li> <li>: If you have any enquiries about the content of this SDS please email lubricantSDS@shell.com</li> </ul> |

1.4 Emergency telephone number

: (+49) 30 3068 6700 (Giftnotruf Berlin)

#### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

#### Classification (REGULATION (EC) No 1272/2008)

Based on available data this substance / mixture does not meet the classification criteria.

#### 2.2 Label elements

#### Labelling (REGULATION (EC) No 1272/2008)

| Hazard pictograms | : |   |
|-------------------|---|---|
| Signal word       | : | No signal word  |

#### 2.3 Other hazards

This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.

Used grease may contain harmful impurities.

High-pressure injection under the skin may cause serious damage including local necrosis. Not classified as flammable but will burn.

#### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| Protection of first-aiders : | When administering first aid, ensure that you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.   |
|------------------------------|---|
| If inhaled :                 | No treatment necessary under normal conditions of use.<br>If symptoms persist, obtain medical advice.   |
| In case of skin contact :    | Remove contaminated clothing. Flush exposed area with wa-<br>ter and follow by washing with soap if available.<br>If persistent irritation occurs, obtain medical attention.  |
|                              | When using high pressure equipment, injection of product<br>under the skin can occur. If high pressure injuries occur, the<br>casualty should be sent immediately to a hospital. Do not wait<br>for symptoms to develop.<br>Obtain medical attention even in the absence of apparent<br>wounds. |
| In case of eye contact :     | Flush eye with copious quantities of water.<br>Remove contact lenses, if present and easy to do. Continue<br>rinsing.<br>If persistent irritation occurs, obtain medical attention.   |
| If swallowed :               | In general no treatment is necessary unless large quantities are swallowed, however, get medical advice.  |

#### 4.2 Most important symptoms and effects, both acute and delayed

| Symptoms : |  | Oil acne/folliculitis signs and symptoms may include formation |
|------------|--|--|

#### **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

#### **Occupational Exposure Limits**

| Components        | CAS-No.           | Value type (Form of exposure) | Control parameters | Basis                                  |
|-------------------|-------------------|-------------------------------|--------------------|--|
| Oil mist, mineral | Not As-<br>signed | TWA (inhalable fraction)      | 5 mg/m3            | US. ACGIH<br>Threshold<br>Limit Values |

#### **Biological occupational exposure limits**

#### 8.2 Exposure controls

#### **Engineering measures**

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

Adequate ventilation to control airborne concentrations.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

General Information:

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Retain drain downs in sealed storage pending disposal or subsequent recycle.

Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

Due to the product's semi-solid consistency, generation of mists and dusts is unlikely to occur.

According to EC No 1907/2006 as amended as at the date of this SDS

# Shell Gadus S2 V220 0

| Version | Revision Date: | SDS Number:  | Date of last issue: 26.05.2021 |
|---------|----------------|--------------|--------------------------------|
| 3.3     | 31.12.2021     | 800001006651 | Print Date 01.01.2022          |

#### Personal protective equipment

The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

| Eye protection           | : | If material is handled such that it could be splashed into eyes,<br>protective eyewear is recommended.<br>Approved to EU Standard EN166.   |
|--------------------------|---|--|
| Hand protection          |   |  |
| Remarks                  | : | Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. PVC, neoprene or nitrile rubber gloves Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended. For continuous contact we recommend gloves with break-through time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model. |
| Skin and body protection | : | Skin protection is not ordinarily required beyond standard<br>work clothes.<br>It is good practice to wear chemical resistant gloves.  |
| Respiratory protection   | : | No respiratory protection is ordinarily required under normal conditions of use.<br>In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material.<br>If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation.<br>Check with respiratory protective equipment suppliers.  |

#### **SECTION 10: Stability and reactivity**

#### 10.1 Reactivity

The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.

#### **10.2 Chemical stability**

Stable.

No hazardous reaction is expected when handled and stored according to provisions

# 10.3 Possibility of hazardous reactions Hazardous reactions Reacts with strong oxidising agents. 10.4 Conditions to avoid Extremes of temperature and direct sunlight. 10.5 Incompatible materials Materials to avoid Strong oxidising agents.

#### **10.6 Hazardous decomposition products**

No decomposition if stored and applied as directed.

According to EC No 1907/2006 as amended as at the date of this SDS

#### **SECTION 13: Disposal considerations**

| 13.1 | Waste treatment methods |   |   |
|------|-------------------------|---|---|
|      | Product                 | : | Recover or recycle if possible.<br>It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations.<br>Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment.<br>Do not dispose into the environment, in drains or in water courses<br>Do not dispose of tank water bottoms by allowing them to drain into the ground. This will result in soil and groundwater contamination.<br>Waste arising from a spillage or tank cleaning should be disposed of in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand. |
|      |                         |   | MARPOL - see International Convention for the Prevention of Pollution from Ships (MARPOL 73/78) which provides technical aspects at controlling pollutions from ships.  |
|      | Contaminated packaging  | : | Dispose in accordance with prevailing regulations, preferably<br>to a recognized collector or contractor. The competence of<br>the collector or contractor should be established beforehand.<br>Disposal should be in accordance with applicable regional,<br>national, and local laws and regulations.   |
|      | Local legislation       |   |   |
|      | Waste catalogue         | : |   |
|      |                         |   | EU Waste Disposal Code (EWC):   |
|      | Waste Code              | : |   |
|      |                         |   | 12 01 12*   |
|      | Remarks                 | : | Disposal should be in accordance with applicable regional, national, and local laws and regulations.  |
|      |                         |   | Classification of waste is always the responsibility of the end user.   |

| ture   |

| REACH - List of substances subject to authorisation (Annex XIV) | : | Product is not subject to Authorisa-<br>tion under REACH. |
|---|---|---|
|   |   |   |

| Water hazard class (Germa-<br>ny) | : | WGK 1 slightly hazardous to water<br>Remarks: Classification according to AwSV, Annex 1 (5.2) |
|-----------------------------------|---|---|
| Volatile organic compounds        | : | Volatile organic compounds (VOC) content: 0 %   |

#### Other regulations:

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

Technische Anleitung Luft: Product not listed by name. Observe section 5.2.5 in connection with section 5.4.9

Product is subject Betriebs-Sicherheits-Verordnung (BetrSichV).

Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), annex XIV.

Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), annex XVII.

Directive 2004/37/EC on the protection of workers from the risks related to exposure to carcinogens or mutagens at work and its amendments.

Directive 1994/33/EC on the protection of young people at work and its amendments. Council Directive 92/85/EEC on the introduction of measures to encourage improvements in the safety and health at work of pregnant workers and workers who have recently given birth or are breastfeeding and its amendments.

| The components of this product are reported in the following inventories: |  |
|---|--|
|---|--|

REACH

: All components listed or polymer exempt.

TSCA : All components listed.

#### 15.2 Chemical safety assessment

No Chemical Safety Assessment has been carried out for this substance/mixture by the supplier.
