SECTION 4 FIRST AID MEASURES

PRINCIPAL ROUTE(S) OF EXPOSURE: Skin

EFFECTS OF EXPOSURE (ACUTE AND CHRONIC): Excessive exposure may result in mild skin or eye irritation. High-pressure injection under skin may cause serious damage. If product is injected into or under the skin, or into any part of the body, regardless of the appearance of the wound or its size, the individual should be evaluated immediately by a physician as a surgical emergency. Even though initial symptoms from high pressure injection may be minimal or absent, early surgical treatment within the first few hours may significantly reduce the ultimate extent of injury. Ingestion may cause gastrointestinal irritation, nausea and/or diarrhea.

IF IN EYES: Flush eyes with water for at least 15 minutes or until irritation subsides.

IF SKIN IRRITATION OCCURS: Wash skin thoroughly with soap and water. If injected under the skin get immediate medical attention. Wash contaminated clothing before reuse.

IF SWALLOWED: Do NOT induce vomiting. Get immediate medical attention.

IF INHALED: No inhalation hazards are expected from this material under normal conditions of use and storage.

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE: None known.

NOTES TO PHYSICIAN: None.

SECTION 5 FIRE FIGHTING MEASURES

NFPA Hazard ID: Health: 0 Flammability: 1 Reactivity: 0

SUITABLE EXTINGUISHING MEDIA: Use water fog, foam, dry chemical, or carbon dioxide (CO₂) for extinction.

UNSUITABLE EXTINGUISHING MEDIA: Straight Streams of Water

108498-108500

FIREFIGHTING PROCEDURES: Evacuate area. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

PROTECTION OF FIRE FIGHTERS: Self-contained breathing apparatus (SCBA) and full protective gear.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Do not store or mix with strong oxidants.

COMBUSTION PRODUCTS: Carbon monoxide, carbon dioxide, fumes and smoke may be released upon combustion and/or thermal decomposition.

SECTION 6 ACCIDENTAL RELEASE MEASURES

PERSONAL PROTECTION: Wear appropriate personal protective equipment when cleaning up spills (See Section 8). Keep unnecessary people away; isolate hazard area and deny entry.

PROCEDURES: Clean up mechanically. Do not flush to sewer or waterways. Prevent release into the environment. Refer to section 15 for spill/release reporting information.

SECTION 7 HANDLING AND STORAGE

HANDLING: Avoid eye contact and prolonged or repeated exposure to skin. Exercise ordinary care and observe good personal hygiene practices when handling this product.

STORAGE: Keep container tightly closed when not in use. Store away from strong oxidizers and at temperatures not exceeding 140°F (60°C).

SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

ENGINEERING CONTROLS: No special requirements under ordinary conditions of use and with adequate ventilation.

PERSONAL PROTECTIVE EQUIPMENT: Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration, and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

EYE/FACE PROTECTION: If contact is likely, safety glasses with side shields or safety goggles are recommended.

SKIN PROTECTION: Any specific glove or protective clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include: No skin protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid skin contact.

RESPIRATORY PROTECTION: If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include: No special requirements under ordinary conditions of use and with adequate ventilation. For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

SPECIFIC HYGIENE MEASURES: Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

ENVIRONMENTAL CONTROLS: Comply with applicable environmental regulations limiting discharge to air, water and soil. Protect the environment by applying appropriate control measures to prevent or limit emissions.
