SAFETY DATA SHEET

Conforms to Regulation (EC) No. 1907/2006 (REACH)

MARK CA

SDS no. 35654

SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier

Product name

: MARK CA

1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified uses

Use of lubricants and greases in open systems - Professional Formulation additives, lubricants and greases - Industrial General use of lubricants and greases in vehicles or machinery - Industrial General use of lubricants and greases in vehicles or machinery - Professional Use of lubricants and greases in open systems - Industrial Lubricating grease

1.3 Details of the supplier of the safety data sheet

UNIMEC S.p.A. via del lavoro, 20 - 20865 Usmate - Velate (MB) ITALIA Tel: +39.039.6076900 Fax: +39.039 6076909 e-mail: info@unimec.eu

Contact

H.S.E

1.4 Emergency telephone number

National advisory body/Poison Centre

Telephone number	: National Poisons Information Service (NPIS): 111
<u>Supplier</u>	
Telephone number	: Emergency telephone: +44 1235 239670

SDS no. 35654

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Eye Irrit. 2, H319

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

Ingredients of unknown	: 1.2 percent of the mixture consists of component(s) of unknown acute dermal
toxicity	toxicity 3.3 percent of the mixture consists of component(s) of unknown acute inhalation toxicity

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

2.2 Label elements

Hazard pictograms

Signal word	: Warning
Hazard statements	: H319 - Causes serious eye irritation.
Precautionary statements	
Prevention	: P280 - Wear eye/face protection.
Response	 P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P337 + P313 - If eye irritation persists: Get medical advice/attention.
Storage	: Not applicable.
Disposal	: Not applicable.
Supplemental label elements	: Contains Benzenesulfonic acid, C10-16-alkyl derivs., calcium salts, Benzenesulfonic acid, mono-C16-24-alkyl derivs., calcium salts and Sulfonic acids, petroleum, calcium salts. May produce an allergic reaction.
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	: Not applicable.

2.3 Other hazards

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.Other hazards which do
not result in classification: Prolonged or repeated contact may dry skin and cause irritation.

SDS no. 35654

SECTION 3: Composition/information on ingredients

Product/ingredient name	Identifiers	%	Regulation (EC) No. 1272/2008 [CLP]	Туре
Benzenesulfonic acid, C10-16-alkyl derivs., calcium salts	REACH #: 01-2119492627-25 EC: 271-529-4	≤5	Skin Sens. 1B, H317	[1]
Benzenesulfonic acid, mono- C16-24-alkyl derivs., calcium salts	CAS: 68584-23-6 REACH #: 01-2119492616-28 EC: 274-263-7	≤3	Skin Sens. 1B, H317	[1]
Sulfonic acids, petroleum, calcium salts	CAS: 70024-69-0 REACH #: 01-2119488992-18 EC: 263-093-9 CAS: 61789-86-4	≤3	Skin Sens. 1, H317	[1]
Benzenesulfonic acid, C10-13-alkyl derivs., Ca Salt	REACH #: 01-2119560592-37 EC: 932-231-6	<3	Skin Irrit. 2, H315 Eye Dam. 1, H318 Aquatic Chronic 3, H412	[1]
			See Section 16 for the full text of the H statements declared above.	

Additional information

: Mineral oil of petroleum origin Product containing mineral oil with less than 3% DMSO extract as measured by IP 346

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

<u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

[6] Additional disclosure due to company policy

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

4.1 Description of first aid measures

Eye contact	: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

÷

Skin contact	: Wash skin thoroughly with soap and water or use recognised skin cleanser. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Ingestion	: Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

4.2 Most important symptoms and effects, both acute and delayed

Over-exposure signs/symptoms

Eye contact	: Adverse symptoms may include the following: pain or irritation watering redness
Inhalation	: No specific data.
Skin contact	: Adverse symptoms may include the following: irritation dryness cracking
Ingestion	: No specific data.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician	:	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments	:	No specific treatment.

SECTION 5: Firefighting measures

5.1 Extinguishing media Suitable extinguishing media	: Use dry chemical, CO ₂ , water spray (fog) or foam.
Unsuitable extinguishing media	: Do not use water jet.

5.2 Special hazards arising from the substance or mixture

Hazards from the	: No specific fire or explosion hazard.
substance or mixture	
Hazardous combustion products	: carbon dioxide carbon monoxide metal oxide/oxides

5.3 Advice for firefighters

Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1 Personal precautions, pro	tective equipment and emergency procedures		
For non-emergency personnel	: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.		
For emergency responders	: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".		
6.2 Environmental precautions	: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).		
6.3 Methods and material for containment and cleaning up			
Small spill	: Move containers from spill area. Avoid dust generation. Using a vacuum with HEPA filter will reduce dust dispersal. Place spilled material in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.		
Large spill	: Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor.		
6.4 Reference to other sections	: See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.		

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Protective measures	• Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

7.2 Conditions for safe storage, including any incompatibilities

:

Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

7.3 Specific end use(s)

Recommendations : Not available.

Industrial sector specific : Not available. solutions

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational exposure limits

No exposure limit value known.

Reportable hazardous constituent(s) contained in UVCB- and/or multi-constituent substance(s) complying with the classification criteria and/or with an exposure limit (OEL)

No exposure limit value known.

Recommended monitoring procedures	: If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

8.2 Exposure controls	
Appropriate engineering controls	: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Individual protection meas	ures
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.
Skin protection	
Hand protection	 Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. Hydrocarbon-proof gloves nitrile rubber Fluorinated rubber Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. In case of prolonged contact with the product, it is recommended to wear gloves complying with EN 420 and EN 374 standards, protecting at least for 480 minutes and having a thickness of 0,38 mm at least. These values are indicative only. The
	level of protection is provided by the material of the glove, its technical characteristics, its resistance to the chemicals to be handled, the appropriateness
Body protection	 of its use and its replacement frequency Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Respirator with combination filter for vapour/particulate Type A/P1 Warning ! filters have a limited use duration The use of breathing apparatus must comply strictly with the manufacturer's instructions and the regulations governing their choices and uses None under normal use conditions
Environmental exposure controls	: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 13: Disposal considerations

13.1 Waste treatment method	ds
<u>Product</u>	
Methods of disposal	: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non- recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.
Hazardous waste	: Yes.
	According to the European Waste Catalogue, Waste Codes are not product specific, but application specific. Waste codes should be assigned by the user based on the application for which the product was used The following Waste Codes are only suggestions: 12 01 12*
<u>Packaging</u>	
Methods of disposal	: The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.
Special precautions	: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Final determination of suitability of any material is the sole responsibility of the user. All materials may present unknown hazards and should be used with caution. Although certain hazards are described herein, we cannot guarantee that these are the only hazards that exist.

Annex to the extended Safety Data Sheet (eSDS)

Identification of the substance or mixture : Mixture **Product definition** : 35654 Code : MARK CA **Product name** Section 1 - Title Short title of the exposure : Use of lubricants and greases in open systems - Professional scenario List of use descriptors : Identified use name: Use of lubricants and greases in open systems - Professional Process Category: PROC01, PROC02, PROC08a, PROC10, PROC11, PROC13 Sector of end use: SU22 Subsequent service life relevant for that use: No. Environmental Release Category: ERC08a, ERC08d **Environmental** ŝ contributing scenarios **Health Contributing** General measures applicable to all activities 2 Material transfers Manual - PROC08a scenarios Roller, spreader, flow application - PROC10 Spraying - PROC11 Treatment of articles by dipping and pouring - PROC13 Equipment cleaning and maintenance - PROC08a Storage - PROC01, PROC02 **Processes and activities** Covers use of lubricants and greases in open systems, including application of τ. covered by the exposure lubricant to work pieces or equipment by dipping, brushing or spraying (without exposure to heat), e.g. mold releases, corrosion protection, slideways. Includes scenario associated product storage, material transfers, sampling and maintenance activities.

Section 2 - Exposure controls

Contributing scenario controlling environmental exposure for 1: No exposure scenario required			
Contributing scenario contro	olliı	ng worker exposure for 2: General measures applicable to all activities	
Concentration of substance in mixture or article	:	Covers percentage substance in the product up to 100% (unless stated differently).	
Physical state	1	Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure.	
Frequency and duration of use/exposure	:	Covers daily exposures up to 8 hours (unless stated differently).	
Other conditions affecting workers exposure	:	Assumes use at not more than 20°C above ambient temperature. unless stated differently. Assumes a good basic standard of occupational hygiene has been implemented.	
Conditions and measures rel	Conditions and measures related to personal protection, hygiene and health evaluation		
Advice on general occupational hygiene	:	Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN 374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent/minimise exposures and to report any skin problems that may develop. Other skin protection measures such as impervious suits and face shields may be required during high dispersion activities which are likely to lead to substantial aerosol release, e.g. spraying. Avoid direct eye contact with product, also via contamination on hands.	
Personal protection	:	Use suitable eye protection.	

measures hour) Natural ventilation is from doors, windows etc. Controlled ventilation measures related to personal protection, hygiene and health evaluation Personal protection : Wear chemical-resistant gloves (tested to EN374) in combination with specific activity training. Contributing scenario controlling worker exposure for 5: Spraying Frequency and duration of use/exposure : Avoid carrying out activities involving exposure for more than 1 hour per day. ventilation control measures : Provide a good standard of general or controlled ventilation (5 to 15 air change hour) Natural ventilation is from doors, windows etc. Controlled ventilation measis supplied or removed by a powered fan. Conditions and measures related to personal protection, hygiene and health evaluation Personal protection Personal protection : Wear suitable coveralls to prevent exposure to the skin. Wear chemical-resistar gloves (tested to EN374) in combination with specific activity training. Respiratory protection : Wear a respirator conforming to EN140 with type A/P2 filter or better. Contributing scenario controlling worker exposure for 6: Treatment of articles by dipping and pouring usplied or removed by a powered fan. Conditions and measures related to personal protection, hygiene and health evaluation Yentilation control : Provide a good standard of general or controlled ventilation (5 to 15 air change hour) Natural ventilation is from doors, windows etc. Controlled ventilation measures is supplied or removed by a powered fan. Website:	: Not applicable.	
Exposure estimation and reference to its source - Environment: 1:		
Exposure assessment (environment):	: Used ECETOC TRA model	
Exposure estimation and reference to its source	: Not available.	

MARK CA	- Use of lubricants and greases in open systems Professional
Exposure estimation and ref	erence to its source - Workers: 2:
Exposure assessment (human):	: The risk Management Mesures/Operational Conditions that are identified in the Exposure Scenario are the outcome of a quantitative and qualitative assessment that covers this product.
Exposure estimation and reference to its source	: Not available.

Section 4 - Guidance to DU to evaluate whether he works inside the boundaries set by the ES

Environment	: Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk
	management measures. Further details on scaling and control technologies are
	provided in SPERC factsheet. If scaling reveals a condition of unsafe use (i.e.,
	RCRs > 1), additional RMMs or a site-specific chemical safety assessment is
	required. For further information see www.atiel.org/reach/introduction.
Health	: Where other risk management measures/operational conditions are adopted, then
	users should ensure that risks are managed to at least equivalent levels. For further
	information see www.atiel.org/reach/introduction.

Additional good practice advice beyond the REACH CSA

Human factors not influenced by risk management	:	Not applicable.	
Other conditions affecting workers exposure	:	Covers percentage substance in the product up to 100% (unless stated differently	y)
Date of issue/Date of revisio	n	: 3/10/2020 21	1/32

Industrial

MARK CA	- Formulation additives, lubricants and greases Industrial
Conditions and measures rel	lated to personal protection, hygiene and health evaluation
Advice on general occupational hygiene	: Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN 374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent/minimise exposures and to report any skin problems that may develop. Avoid direct eye contact with product, also via contamination on hands.
Personal protection	: Use suitable eye protection.
Elevated temperature	olling worker exposure for 3: General exposures Use in contained systems
No other specific measures id	
Conditions and measures rel	lated to personal protection, hygiene and health evaluation
Contributing scenario contro at elevated temperatures	olling worker exposure for 4: Mixing operations Closed systems Batch processes
Ventilation control measures	: Provide extract ventilation to points where emissions occur.
Conditions and measures rel	lated to personal protection, hygiene and health evaluation
Contributing scenario contro elevated temperatures	olling worker exposure for 5: Mixing operations Open systems Batch processes at
Frequency and duration of use/exposure	: Avoid carrying out activities involving exposure for more than 4 hours per day.
Ventilation control measures	: Provide extract ventilation to points where emissions occur.
Conditions and measures rel	lated to personal protection, hygiene and health evaluation
Contributing scenario contro	olling worker exposure for 6: Mixing operations (open systems)
Ventilation control measures	: Provide extract ventilation to points where emissions occur.
Conditions and measures rel	lated to personal protection, hygiene and health evaluation
Contributing scenario contro	olling worker exposure for 7: Process sampling
Frequency and duration of use/exposure	: Avoid carrying out activities involving exposure for more than 1 hour per day.
Conditions and measures rel	lated to personal protection, hygiene and health evaluation
Personal protection	: Wear chemical-resistant gloves (tested to EN374) in combination with specific activity training.
Contributing scenario contro	olling worker exposure for 8: Bulk transfers Dedicated facility
Frequency and duration of use/exposure	: Avoid carrying out activities involving exposure for more than 4 hours per day.
Conditions and measures rel	lated to personal protection, hygiene and health evaluation
Personal protection	: Wear chemical-resistant gloves (tested to EN374) in combination with intensive management supervision controls.
Contributing scenario contro	olling worker exposure for 9: Drum/batch transfers Dedicated facility
Ventilation control measures	: Provide extract ventilation to points where emissions occur.
Conditions and measures rel	lated to personal protection, hygiene and health evaluation

MARK CA	- Formulation additives, lubricants and greases Industrial
Contributing scenario contro	olling worker exposure for 10: Drum/batch transfers Non-dedicated facility
Frequency and duration of use/exposure	: Avoid carrying out activities involving exposure for more than 1 hour per day.
Ventilation control measures	: Provide a good standard of general or controlled ventilation (10 to 15 air changes per hour).
Conditions and measures re	elated to personal protection, hygiene and health evaluation
Personal protection	: Wear chemical-resistant gloves (tested to EN374) in combination with intensive management supervision controls.
Contributing scenario contr	olling worker exposure for 11: Equipment cleaning and maintenance
Technical conditions and measures to control dispersion from source towards the worker	: Retain drain-downs in sealed storage pending disposal or for subsequent recycle.
Engineering controls	: Drain down and flush system prior to equipment break-in or maintenance.
Conditions and measures re	elated to personal protection, hygiene and health evaluation
Advice on general occupational hygiene	: Clear spills immediately.
Personal protection	: Wear chemical-resistant gloves (tested to EN374) in combination with intensive management supervision controls.
Contributing scenario contro	olling worker exposure for 12: Drum and small package filling
Ventilation control measures	Provide a good standard of general or controlled ventilation (10 to 15 air changes per hour).
Conditions and measures re	elated to personal protection, hygiene and health evaluation
Personal protection	: Wear chemical-resistant gloves (tested to EN374) in combination with specific activity training.
Contributing scenario contro	olling worker exposure for 13: Laboratory activities
Frequency and duration of use/exposure	: Avoid carrying out activities involving exposure for more than 4 hours per day.
Conditions and measures re	elated to personal protection, hygiene and health evaluation
Contributing scenario contro	olling worker exposure for 14: Storage
Engineering controls	: Store substance within a closed system.
Conditions and measures re	elated to personal protection, hygiene and health evaluation

Section 3 - Exposure estimation and reference to its source

Exposure estimation and reference to its source	:	Not available.
Exposure estimation and ref	ere	nce to its source - Workers: 2:
Exposure assessment (human):	:	The risk Management Mesures/Operational Conditions that are identified in the Exposure Scenario are the outcome of a quantitative and qualitative assessment that covers this product.
Exposure estimation and reference to its source	:	Not available.

Section 4 - Guidance to DU to evaluate whether he works inside the boundaries set by the ES

MARK CA	- Formulation additives, lubricants and greases Industrial
Environment	: Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures. Further details on scaling and control technologies are provided in SPERC factsheet. If scaling reveals a condition of unsafe use (i.e., RCRs > 1), additional RMMs or a site-specific chemical safety assessment is required. For further information see www.atiel.org/reach/introduction.
Health	: Where other risk management measures/operational conditions are adopted, then users should ensure that risks are managed to at least equivalent levels. For further information see www.atiel.org/reach/introduction.

Identification of the subs	nce or mixture	
Product definition	Mixture	
Code	35654	
Product name	MARK CA	
Section 1 - Title		
Short title of the exposure scenario	General use of lubricants and greases in vehicles or machinery - Industrial	
List of use descriptors	Identified use name: General use of lubricants and greases in vehicles or machinery - Industrial	
	Process Category: PROC01, PROC02, PROC08b, PROC09	
	Sector of end use: SU03 Subsequent service life relevant for that use: No.	
	Environmental Release Category: ERC04, ERC07	
Environmental contributing scenarios		
Health Contributing	General measures applicable to all activities	
scenarios	General exposures (closed systems) - PROC01	
	Initial factory fill of equipment Use in contained systems - PROC02, PROC Initial factory fill of equipment Open systems - PROC08b	209
	Operation of equipment containing engine oils and similar Use in contain systems - PROC01	ed
	Equipment cleaning and maintenance - PROC08b	
	Equipment cleaning and maintenance Operation is carried out at elevated temperature (> 20°C above ambient temperature) - PROC08b Storage - PROC01, PROC02	1
Processes and activities covered by the exposure scenario	Covers general use of lubricants and greases in vehiculs or machinery in closed systems. Includes filling and draining of containers and operation of enclosed machinery (including engines) and associated maintenance and storage activities	

Section 2 - Exposure controls

Contributing scenario contro No exposure scenario require	olling environmental exposure for 1: ed
Contributing scenario contro	olling worker exposure for 2: General measures applicable to all activities
Concentration of substance in mixture or article	: Covers percentage substance in the product up to 100% (unless stated differently).
Physical state	: Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure.
Frequency and duration of use/exposure	: Covers daily exposures up to 8 hours (unless stated differently).
Other conditions affecting workers exposure	 Assumes use at not more than 20°C above ambient temperature. unless stated differently. Assumes a good basic standard of occupational hygiene has been implemented.
Conditions and measures re	lated to personal protection, hygiene and health evaluation
Advice on general occupational hygiene	: Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN 374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent/minimise exposures and to report any skin problems that may develop. Avoid direct eye contact with product, also via contamination on hands.
Personal protection	: Use suitable eye protection.
