

perma CONNECT

The application for digital lubrication point management

**EASY. SMART.
CONNECTED.**

WHY PERMA CONNECT?

Simple and intuitive - configure and maintain all perma lubrication systems via mobile devices

perma CONNECT provides you with a comprehensive overview of all lubrication points, enabling centralised management of your maintenance processes. Whether from your workstation or even on the go, our intelligent application ensures seamless access to critical lubrication point data at any time and from any location. With extensive remote control functions, you can optimise operational efficiency, save valuable time, and make a significant contribution to improving safety within your organisation.

perma demonstrates how it works!

MAINTENANCE & EXCHANGE

SURVEY

➊ Precise calculation of the relubrication amount

Supported applications include:

- » Electric motors
- » Pumps
- » Blowers & fans
- » Conveyors
- » Chains

Alternatively, the relubrication amount can be calculated based on the bearing designation or by performing manual lubrication.

➋ Reliable determination of the discharge period

➌ Helpful suggestions for the installation

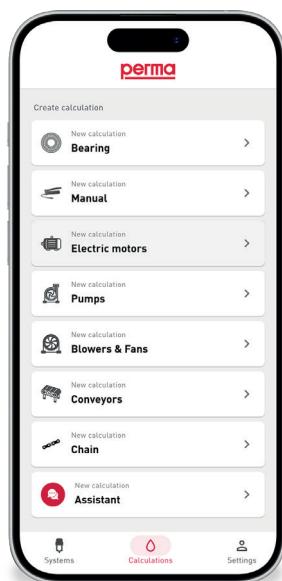

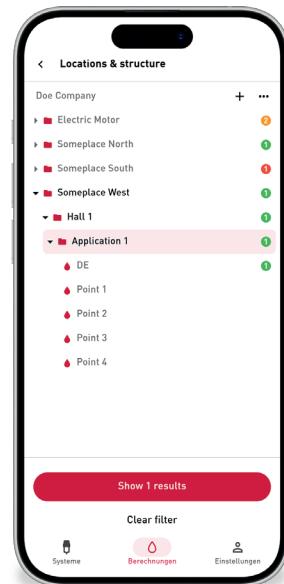

- » Recommendation of the suitable INSTALLATION KIT for the lubrication system

➍ Simple creation of the organisational structure

Various structural elements:

- » Mounting location
- » Application
- » Further unit
- » Lubrication point

Transform your calculations directly into lubrication points or applications, and seamlessly integrate them into your organisational structure.

INSTALLATION

⊕ Convenient configuration and remote control via the application

- » Configuration of the lubrication system via Bluetooth and LoRa®
- » Triggering an additional discharge (PURGE)
- » Subsequent adjustment of the configuration

Communication via Bluetooth

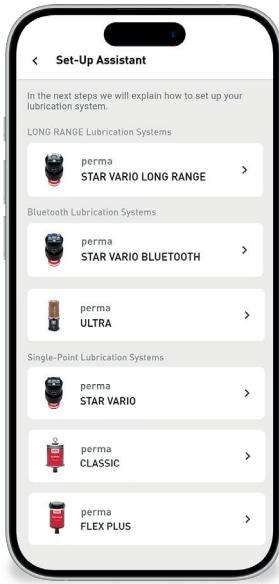

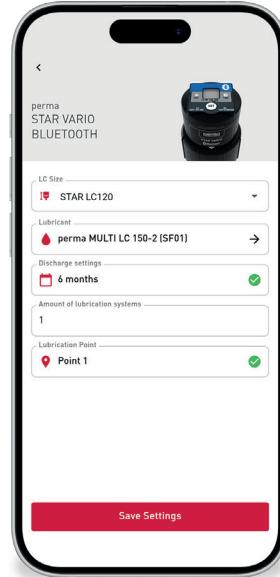

perma STAR VARIO BLUETOOTH

Communication via LoRa®

perma STAR VARIO LONG RANGE

⊕ Flexible assignment of user roles

- » Different roles can be assigned (e.g. owner, user, changer)
- » User permissions can be customised individually

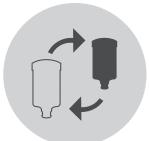

⊕ Easy digitalisation

- » Record non-digital lubrication systems also to fully leverage the benefits of perma CONNECT

Non-digital lubrication systems, e.g.

MAINTENANCE & EXCHANGE

⊕ Comprehensive overview of all lubrication points

- » Clear presentation of all lubrication systems and their status
- » Using the filter and search function or your established organisational structure, you can efficiently navigate to the desired system

⊕ Proactive notifications for required actions

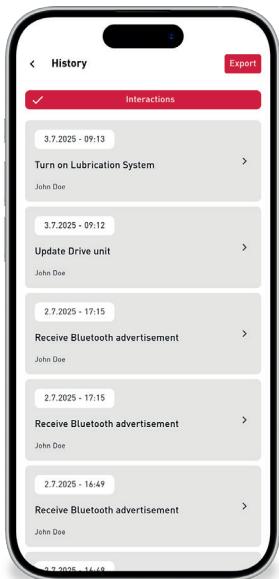

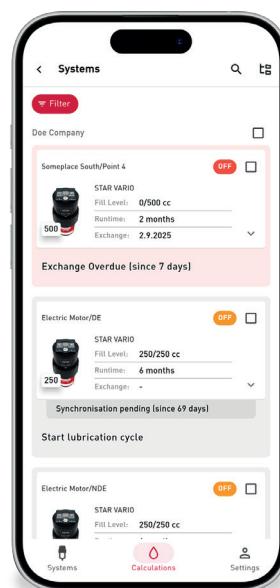

- » Automatic email alerts are sent for upcoming exchanges, along with information on required materials
- » Error message notifications allow for a prompt response

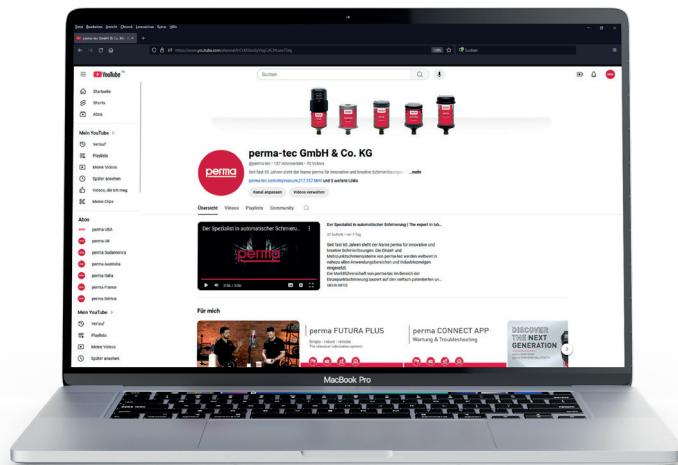

⊕ Efficient creation of material lists

- » Quickly generate detailed material lists in common PDF format

⊕ Automatic documentation

- » All activities can be tracked in the history and exported as CSV-files

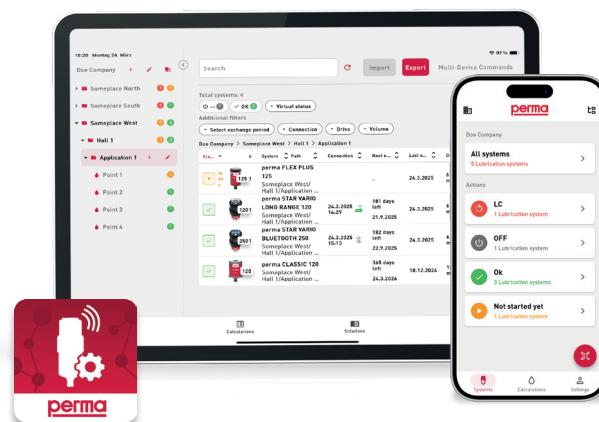

To quickly get started with perma CONNECT, a range of step-by-step tutorial videos are available.
